Overview

Reading objects and photos (psychometry) is a fun and engaging way to pick up information through the psychic senses. Yes, everybody – including you – has them! Learn how to not only read objects themselves, but discover ways of picking up details about the current and original owners too. Psychometry acts great as an added service to those offering psychic readings as well as a jumping point for mediums wanting to connect to a particular loved one in spirit for a sitter to name just a few ways in which this way of reading energy can be applied.

No prior experience in psychic development or mediumship is necessary to participate.

Chris DeSerio, MA, CHt is an internationally renowned medium and energy healer who took his original anxieties and fears of the Spirit World and how he seemed to feel and know things inexplicably as a child, and embraced a path of learning that he now shares in the roles of teacher, tutor, and friend. He's been interviewed and featured by numerous publications on topics ranging from manifesting a better life to animal communication to being an intuitive healer (and how that comes into play as a psychotherapist and hypnotist). He has made several guest appearances on *The Lois Wright Show* in East Hampton, NY in which his unique blend of healing skills were explored. One of Chris' greatest gifts is in helping people recognize their unique connection to the Spirit World and how to best benefit from that exchange of what is love, compassion, awareness, understanding, and tremendous growth for those open to these life-changing experiences. To aid in this path of exploration, Chris authored *The 2 Keys for You to Succeed in Business and Personal Life Using Your Natural Psychic Gift* and is busy at work finalizing several other texts and guides to further expand your development. You can read more about Chris at www.chrisdeserio.com.
